*NOTE: Colors are replicated here as closely as the printing process allows. Please ask your pool representative for a physical color sample for best results. Disclaimer: Renderings are for illustrative purposes only and are not intended to serve as exact/scaled representations of the actual product. All measurements are from widest outside edges of pool shell and may vary by up to 3%.*

### Technology

Our proprietary AquaShield Technology™ provides the ultimate safeguard against corrosion and osmotic blistering that can compromise the reliability of lesser pools. Utilizing industry-leading vinyl ester resin, AquaShield Technology™ is engineered to deliver every Glimmerglass pool owner a superior leisure experience season after season, year after year.

Glimmerglass pools are made with the highest-quality raw materials on the market. Our team works tirelessly to source premium products from North America's top suppliers, including Owens Corning. Each Glimmerglass pool shell is reinforced with Owens Corning OptiSpray®

PRO Roving, which provides superior mechanical performance and corrosion-resistant properties.

Layers of high-grade vinyl ester resin and fiberglass create a shell with unrivaled structural integrity. A gelcoat surface layer adds brilliant color that glimmers in the sunlight and never fades.

The result is a pool shell that is both beautiful and durable, with the strength and flexibility to shift with surrounding soil and withstand extreme swings in temperature.
